

P.D. Peterka & Associates, Inc.

Making Outsourcing the Comfortable Choice

FOUNDATION: Founded in 1987, P.D. Peterka & Associates has grown from a small machine shop to a fully equipped manufacturing company. Our founders were early to realize the need for a reliable, cost effective, and flexible source to supplement manufacturing. You now have access to a complete range of metal cutting and finishing machine capabilities with highly qualified professionals located in the U.S.

APPROACH: A key element of our success results from providing a comfortable made-in-America outsourcing solution for companies who need manufacturing assistance to complement their in-house capabilities. We take a practical, common sense approach to your specific needs and concerns—especially those of costs, quality control, and turnaround time.

PROCESS: The entire process is controlled using our automated ERP system to ensure timely production and monitor progress at every stage. To serve you best, we utilize both our internal resources and a network of over 100 approved sources of product manufacturing and material suppliers.

VALUES: The values of P.D. Peterka run deeper than the cost. We are dedicated to a diligent, hands on approach that allows us to manage your projects flawlessly. We take pride in accountability and acknowledge the difference between getting the job done, and getting the job done with a high level of customer service.

COMMITMENT: When you choose P.D. Peterka, you're choosing collaboration and dedication. We always strive to give you what you want, and we're not afraid to work for you. We will work with you to modify the necessary aspects that will ensure optimal performance. You get a total solution from the people who care and the people who can. Together, let's make outsourcing the comfortable choice.
